

Located in **Dayton, Ohio**, **Elliott Tool Technologies** has an exciting opportunity to join their team as an **Application Developer**. In this role, you will develop applications to solve customer challenges. You will have the freedom to experiment with new and existing technologies, enjoy project-based work and collaborate and learn from others cross-functionally throughout the business. There will be continuous learning opportunities to keep the job interesting.

**Elliott Tool Technologies** has spent more than 125 years delivering quality tools to customers who need them to continue operating in an “I need it yesterday” world. At Elliott Tool Technologies, you will enjoy a culture that values integrity, passion, and a common vision, where team members on average have a tenure of more than a decade.

If you meet the qualifications and are looking for mentorship and professional development with an established, industry-leading company, we would love to talk with you soon – as in, “We need you yesterday!”

### **Key Activities**

- Collaborating with the Business Development and Operations teams to ensure applications align with customer needs and organizational goals.
- Learning and applying Agile/Lean methods to improve company software applications.
- Learning to build and customize existing applications to fulfill internal customer needs.
- Maintaining dashboards, modules and customizations of web-based reporting tools and CRM, utilizing JavaScript, PHP, and Rest API.
- Testing, troubleshooting, and debugging applications to ensure they’re running properly.
- Finding solutions to security threats, viruses, or errors that might hinder performance of applications.
- Conducting regular security and performance checks.
- Staying current on technology trends to keep software and applications as innovative as possible.

### **Qualifications & Requirements**

- Experience with entry level applications development or web development, and business analysis and .NET framework
- Experience with entry level Javascript, PHP, SQL and Rest API is preferred
- Proficient in MS Office (particularly MS Excel and MS Access)
- Degree within relevant field and/or technical certifications is a plus
- Live within a 45-minute commute of Dayton, OH

### **Skills & Abilities**

- Strong communication and customer service skills to manage both internal and external relationships

- Self-motivated and analytical individual who is passionate about problem-solving and delivering results
- Excellent organizational skills and attention to detail
- Process and results-oriented
- A team player who is coachable and open to new ways of thinking
