

Located in **Dayton, Ohio**, **Elliott Tool Technologies** has an exciting opportunity to join their team as a **Senior Application Developer**. In this role, you will provide leadership related to the company's overall software architecture and design. You will be focused on the creation of better workflows and end-user experiences and have the freedom to experiment with new and existing technologies. You will enjoy project-based work and collaborate and learn from others cross-functionally throughout the business.

Elliott Tool Technologies has spent more than 125 years delivering quality tools to customers who need them to continue operating in an "I need it yesterday" world. At Elliott Tool Technologies, you will enjoy a culture that values integrity, passion, and a common vision, where team members on average have a tenure of more than a decade.

Are you an Agile-minded Senior Application Developer who is looking to join an industry-leading company that is committed to excellence and hungry for new application development innovations? If so, we would love to talk with you soon – as in, "We need you yesterday!"

Key Activities

- Collaborating with the Business Development and Operations teams to ensure applications align with customer needs and organizational goals.
- Applying Agile/Lean methods to improve company software applications.
- Designing, building, and customizing existing applications to fulfill internal customer needs.
- Developing and maintaining dashboards, modules and customizations of web-based reporting tools and CRM, utilizing JavaScript, PHP, and Rest API.
- Testing, troubleshooting, and debugging applications to ensure they're running effectively and efficiently.
- Finding solutions to security threats, viruses, or errors that might hinder performance of applications.
- Staying current on technology trends to keep our software and applications as innovative as possible..
- Sharing your expertise to help other team members grow and support Elliott's continuous improvement efforts.

Qualifications & Requirements

- 5+ years related experience within applications development or web development, and business analysis
- Experience with .NET framework
- Experience with Javascript, PHP, SQL and Rest API
- Experience within an Agile environment
- Proficient in MS Office (particularly MS Excel and MS Access)
- Degree within relevant field and/or technical certifications is a plus

- Live within a 45-minute commute of Dayton, OH

Skills & Abilities

- Strong communication and customer service skills to manage both internal and external relationships
- Self-motivated and analytical individual who is passionate about problem-solving and delivering results
- Excellent organizational skills and attention to detail
- Process and results-oriented
- A team player who is coachable and open to new ways of thinking
