

Software Developer

Position Overview

Located in the heart of downtown **Cincinnati, OH** you can find **GBBN**, where architecture goes beyond building! At GBBN they understand that technology provides insights into how people interact with space and gives clients the knowledge to do more with their facilities. GBBN has clients all over the world, with offices in Cincinnati, Louisville, Minneapolis, Pittsburgh, and Beijing.

They are seeking a **Software Developer** to join their innovative In4mation team. In this role, you will provide customized and integrated software solutions to clients spanning multiple industries. You will have the opportunity to embody the organization's mission of positively affecting people (after all it's the most important thing they do). This position offers a **fully remote opportunity**, a knowledgeable and collaborative team, as well as the opportunity to support incredible clients!

If you are a design savvy Software Developer with knowledge of programming languages and the software development lifecycle- let's talk!

Key Activities

- Collaborate with the In4 team to gather and develop operational, technical, and data requirements to meet client's specific needs.
- Provide solutions through data analysis, code review, editing, query development, and testing.
- Design and implement relational database table structures, relationships, and schemas.
- Create end-user documentation (application tutorials), FAQ's, and application notes for internal and external audiences.
- Perform quality checks on system data and published drawings.
- Continuously grow and develop knowledge of system capabilities, enhancements, and new technologies.
- Provide quick troubleshooting for other teams using the system.
- Design and produce both standard and customized reports for clients.
- Perform user testing for system enhancements and upgrades.
- Assist with maintaining test sites to ensure appropriate accessibility for team members and alignment with production sites.
- Perform product audits and provide defect resolution or enhancement recommendations.

Qualifications & Requirements

- Associates Degree or higher in Software Engineering, Computer Science, Data Science, or related field.
- 2+ years' experience developing applications in a collaborative team environment.
- Proficient in Java, JavaScript, SQL / referential database experience.
- Experience with HTML, CSS, and API preferred.
- Full stack development experience
- Familiarity with utilizing a code repository like Git, BitBucket, etc.
- Previous experience in QA/QC
- Experience with ARCHIBUS, and/or Web Central preferred.

Skills & Abilities

- Demonstrated ability to work independently and with minimal supervision.
- Outstanding customer service skills and communication skills.
- Consultative in nature, comfortable working in a client-facing capacity.
- Excellent organizational skills.
- Proven problem-solving skills, troubleshooting ability, and attention to detail.
- Ability to create and edit project documents, materials, and presentations.
- Strong technical skills and understanding of data structures/database management.
- Proven aptitude in utilizing software development life cycle.

Why join forces with our client?

GBBN offers a competitive base salary, annual performance bonuses, profit sharing, and 401(K). Medical, dental, vision, are also available, along with company paid life insurance, and optional long and short term disability. GBBN also provides a flexible work environment that helps employees meet personal demands. Employees receive paid holidays, a winter sabbatical, and a generous bank of PTO.
