

Quality Manager

Position Overview

Our client has over 25 years in the medical and packaging businesses, specializing in innovative and alternative solutions for various industries. To support growth, they are adding a **Quality Manager** to their team, reporting to the VP of Operations.

The Quality Manager will promote a culture of continuous improvement by designing, implementing, and maintaining quality standards throughout the company for both suppliers and customers, on a global scale. The primary goal for this position is to accomplish ISO certification by the end of 2022. This position will lead that process and once in place will continue to manage the quality standards.

This position is based out of **Cincinnati, OH**, and will oversee quality operations for both the US and EU facilities. **Remote work options are available** for this position and those who live outside of Cincinnati are welcomed to apply. Occasional travel to Cincinnati and the EU will be required.

Are you a Quality leader with experience in leading the implementation of ISO who wants to be a part of a growing team and exploding industry? If so, we'd love to talk with you!

Key Activities

- Lead implementation of GxP practices and ISO9001 standards to achieve goal of 2022 certification
- Develop and maintain company Quality Management System at all company locations
- Coordinate, conduct, and track company wide training and comprehension tests, as required
- Lead, resolve and track company wide CAPA investigations with response to customers, as required, within established timeframe
- Research, evaluate and advise on all QA controls and procedures for further improvements
- Lead internal system audits and work in the role of a liaison during customer/third party audits
- Serve as a change agent by using strong people and communication skills to motivate others to "always be better"
- Participate in hiring, training, and leading a team as business needs grow

Qualifications & Requirements

- Bachelor's degree in related field or equivalent work experience
- 5+ years experience in quality assurance and/or improvement
- Experience with ISO9001 implementation
- Project management experience is preferred
- Experience in a high demand, multifaceted manufacturing operation or in clinical trials is preferred
- Ability to travel domestically and internationally, up to 5 times per year

Skills & Abilities

- Confident; with demonstrated experience of driving change through the creation & implementation of ISO and process improvements
- Experience with delegation, problem solving, and decision making
- Excellent communication skills, highly conscientious and diligent
- Strategic & visionary with an ability to inspire others
- Ability to prioritize & adapt in a fast-paced environment

Benefits & How to Apply

Other perks include Medical, Dental, and Vision Insurance, PTO, 401K contributions and company-paid holidays.
